Intermediate Network Integration Specialist

Immediate Opportunity:

Are you looking for new challenges, learning, and getting things done?

microworks is a leading provider of outsourced IT. Founded in 1985, **microworks** is a Gold Level Microsoft Partner with a commitment to top quality services and very high customer satisfaction ratings. We provide web-enabled collaboration, enterprise content management, CRM systems, and end-to-end IT infrastructure.

microworks has an immediate opportunity for an Intermediate Microsoft Network Integration Specialist to design, implement and support our customer IT infrastructure using Microsoft server platforms.

You will be part of a team that designs and integrates network solutions involving Microsoft, Cisco, HP, and other leading manufacturers. You will have a role through the complete project lifecycle from needs analysis, to proposal writing, system implementation, customer acceptance, and support.

You are a self-starter, like learning, look for challenges, and enjoy sharing knowledge. You are able to work independently, you are organized, and good at follow up. You are committed to best practices for network design and for project delivery.

Activities:

- Analyze customer needs, design solutions, implement systems, provide support;
- Provide expertise related to Microsoft and other network technologies;
- Collaborate with the other business units at **microworks**

Qualifications:

- 5+ years' experience with network and server design, implementation, and operations
- 5+ years' experience with backup systems, network fundamentals
- University or College Degree in Computer Science or related discipline
- Proven skills with Microsoft Windows Server and Exchange Server
- Microsoft Advanced Certification (MCITP) or equivalent
- Experience in elements of project lifecycle from needs analysis, to solution design, implementation and customer acceptance and support

Desirable skills:

- Microsoft CRM, SharePoint, and SQL
- Virtualization experience (VMware, Hyper-V)
- Cisco CCNA or relevant experience
- Security Clearance
